

PRESS RELEASE

TRESCAL AWARDED 'EUROPEAN CALIBRATION AND REPAIR SERVICES COMPANY OF THE YEAR'

Paris, 11th July 2016. Trescal, international specialist in calibration, has been awarded the accolade of 'European Calibration and Repair Service Company of the Year' in Frost & Sullivan's 2016 Best Practices Awards. The award recognises Trescal's commitment to growth and investment across Europe in addition to its continued use of best practices.

The prestigious award was announced following a detailed analysis of Trescal's performance, added value, and innovation in the field. This was supported by Trescal's continued acquisition-led growth and involvement in the European Metrology Research Program and European Metrology Program for Innovation and Research.

Olivier Delrieu, Chief Executive Officer at Trescal, said: "The calibration and repair industry must adapt to customer requirements, which is exactly what winning this Frost & Sullivan Best Practice Award recognises. By providing a 'one-stop-shop' multi-service and multi-brand calibration and repair offering for our 35,000 customers, Trescal delivers best-in-class and now award-winning services."

Apoorva Ravikrishnan, Research Analyst for Measurement & Instrumentation at Frost & Sullivan, said: "The cornerstone for Trescal's customer service and support is the in-depth technical competence it has developed over many years in the calibration services market. Moreover, Trescal has relentlessly worked to be a complete calibration service partner to its customers by offering services and support from the installation and acquisition of measurement systems, computerized asset management solutions, to metrological and technical support and training."

The award for 'European Calibration and Repair Service Company of the Year' will be officially presented to Trescal by Frost & Sullivan at an awards ceremony held in Paris later this year.
